Skills

Programming Languages

Python
Java
Java Swing GUI
HTML CSS Java Script

Database

MySql
SQLServer
MongoDB

UI/UX

Canva
Figma

Certification

- Data Scientist with Python
- Front End Development - CSS
- Front End Development - JavaScript
- UI/UX
- Introduction to Cyber Security

About Me

Motivated software engineering student skilled in programming languages and agile methodologies. Strong problem-solving abilities and experience in real-world projects. Passionate about staying updated with emerging technologies and eager to contribute creatively in the tech industry for positive impact. Seeking opportunities to apply and enhance knowledge.

Education

BS in Software Engineering (In process)

2020 - 2024

USMAN INSTITUTE OF TECHNOLOGY (NED)

Work Experience

Millennium Software (Pvt.) Limited

Web Developer

- I actively contributed to web development projects by designing, coding, and maintaining responsive websites using HTML, CSS, Bootstrap, JavaScript and AngularJS. Collaborating with a skilled team, I enhanced user experience and gained insights into front-end and back-end integration.

Projects

File Server

Developed a multi-threaded system allowing efficient file management between clients and a server, optimizing file transfer and retrieval processes.

Catering Management System

Created a Java-based desktop application integrated with a MySQL database to efficiently manage catering services. Implemented Flask APIs to enable seamless communication with the backend

Coffee Management System

A Python Tkinter-based application designed to streamline and enhance coffee shop operations, providing efficient order processing, inventory management
